

wise analyzer

Analyze your data

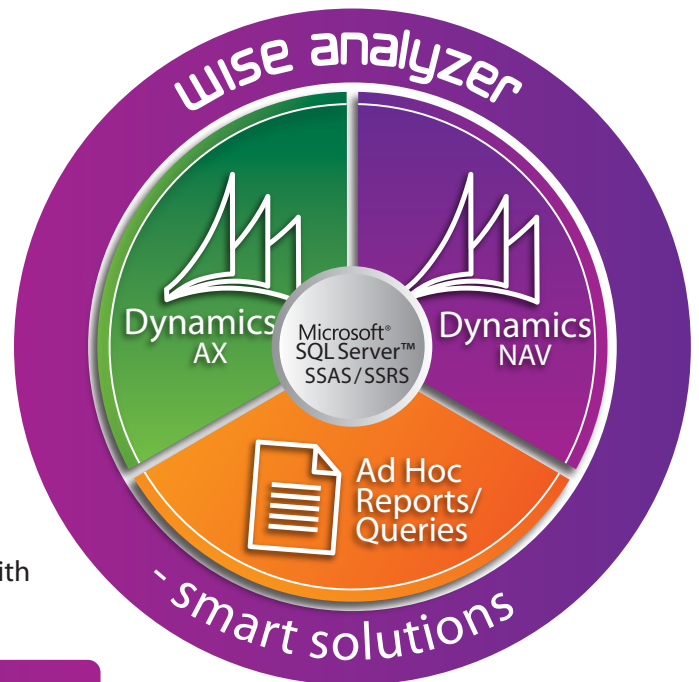

Wise Analyzer is a software solution that gives you enhanced capability to monitor and analyse management information in real time.

This business analysis environment is specially designed for working with data and distributing valuable information.

Wise Analyzer processes data in real time and can use functionality such as OLAP cubes for multicompany and multidimensional views.

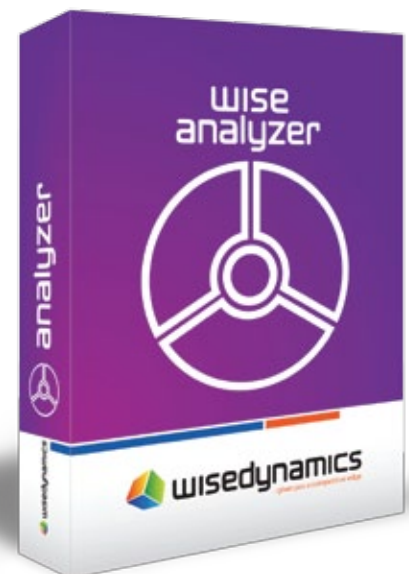

Wise Analyzer simplifies decision making, giving managers an improved overview of their operation.

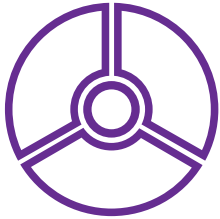

This user-friendly solution is easy to install and works with newer versions of Dynamics NAV and Dynamics AX.

Wise Analyzer features:

- A wide range of real-time analytical tools.
- Effective distribution of information with a better operational overview.
- Easy and flexible ways to filter data.
- Familiar and powerful Pivot interface for easy slicing and dicing of data.
- Powerful graphics
- Sophisticated Report Builder with pre-defined templates.
- Visual Query Builder for ad hoc reporting.
- Add both custom and standard fields from NAV tables "on the fly".
- Reduces operational overheads and cost of specialized service.
- Updates automatically to ensure you always have the latest version.
- Business analysis for all—at a fair price.

wise analyzer

Key Benefits:

- Wise Analyzer allows you to see your financial, business, accounting, stock and process information in a wide range of views.
You can easily switch between views, save them and allow other to use them.
- Use Wise Analyzer to utilize your OLAP cubes in the same powerful interface.
- OLAP perspectives are saved centrally for all to use. It is therefore the perfect end point for OLAP cubes.
- Set targets, see results and easily understand the business implications of the data.
- Identify trends – both beneficial ones and causes for concern.
- Take action with a common framework for decision-making
