Web Approval

- a convenient and flexible solution

The Web Approval system allows Dynamics NAV users, with access to the Approval system, to review and approve invoices, wherever they are located. All you need is access to the Internet and the right permissions.

The Web Approval system is suitable for all industries and is particularly suitable for companies with multiple offices. The solution is flexible and can be adapted to the different needs and requirements of each business.

With the Web Approval system users can approve, edit or reject any invoices they get for approval, in part or in full.

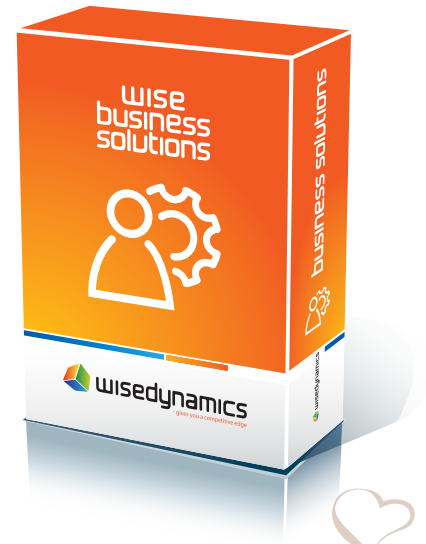

If a scanned invoice or attachment exists in Wise Scan, it is displayed. You can easily filter data and find invoices.

The approval party can see an overview of all his invoices, including previously approved accounts.

You can amend ledger accounts, dimensions and invoice amounts and even add comments. All changes are updated in real time between the web and Dynamics NAV.

The Wise Web Approval system serves many of the most demanding Dynamics NAV users.

The solution is for big and small businesses alike.
