Wise Transport system

- a specialized solution for transport companies

Wise has developed a solution that is perfectly suited for transport companies, Freight forwarding companies and general transport businesses.

The solution provides an overview of the whole process. From the time the product is retrieved from the manufacturer, transportation to and from the country, customs handling, delivery and other steps involved in getting the product to the consumer in a secure and timely manner.

Extensive experience lies behind the development of the system and a large part of Iceland's transport companies have used the Wise Transport System for years. Just recently Posta, one of Faroe Islands largest transport companies, started using the system.

Key Benefits

- Quote system, offers electronic transmission of the pick-up, quote supervision etc.
- Manifest for airlines and shipping companies.
- Manifest, batch shipments or breakdowns.
- Express system, a complete system that keeps track of registration, customs clearance, invoicing and home delivery.
- Customs clearance system that is connected to the Express and Freight system which in turn prevents the user from entering the same shipment data twice.
- Invoicing, provides a good overview of invoices down to each shipment.
- Reverse invoices and correct balance in a simple way.
- Delivery system, provides good overview and organizes deliveries.
- Cashier system, a simple cash register system that receives payments and applies entries to invoices.
- Warehouse real-time overview, where the user can see what has arrived and what is pending. Direct connection to Freight and Express system.
- The ability to send reports by e-mail from the system. For example quotes, pick-ups, invoices and notifications.
