

wise cubes

Simple solutions - for business intelligence

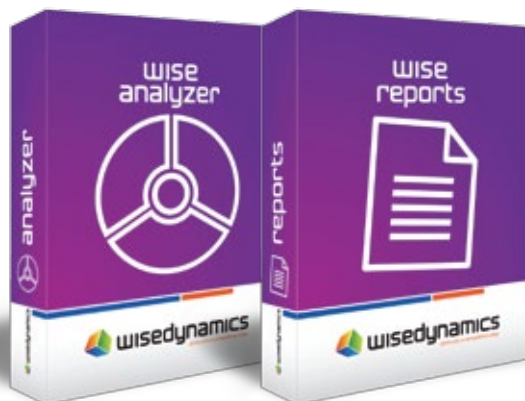

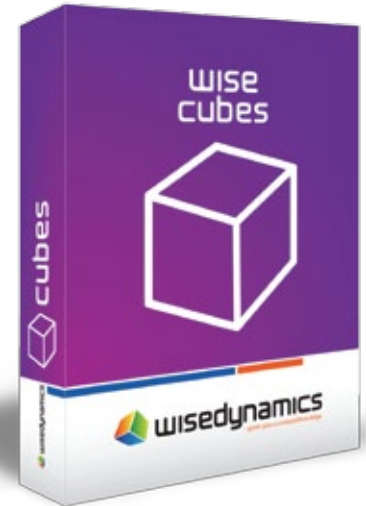

You don't have to be an expert in the field of business intelligence or put in all your time and expenses to get what you need out of your Microsoft Dynamics NAV data. Wise has developed a standardized solution for business intelligence, Wise Cubes, that delivers information and analysis quickly and safely. This solution suits all companies, regardless of size or industry. Wise Cubes is a welcome addition to Microsoft Dynamics NAV, that allows users to make enlightened business decisions that are based upon solid information.

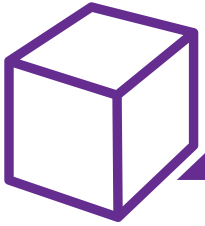

Many ways to analyse your information

The user can choose cubes that analyse sales, purchases, supplies, budget or other standardized Microsoft Dynamics NAV system units. Then choose a convenient form to publish and analyse the information, such as Wise Analyzer or Microsoft Excel.

To make the best decisions, it is essential to have the newest information.

wise cubes

Gives an overview of the company's business and provides you with a powerful analysing tool for business intelligence.

Overview

OLAP cubes

OLAP cubes give a clear vision on information in Microsoft Dynamics NAV. It is possible to choose between cubes that analyse data from sales, purchases, stocks, business demands, creditors, budget, supplies and workbook accounting.

Joint dimensions

The cubes work in the same dimensions as other system units from Microsoft Dynamics NAV. The system provides the opportunity to join two or more cubes to connect data from many companies or various system units.
