Wise POS

- retail solution

Wise POS is a point-of-sale (POS) system, integrated into Dynamics NAV, a solution for retailers, wholesalers and service businesses.

Wise POS is an all-in-one solution where the same service provider handles both the accounting system and POS system. The benefits are that you save time, cost and there is no need to connect to two systems.

The system features a POS window and a payment window and is developed to be simple and easy to use.

Sales representatives have a special login into the system, ensuring full safety and tracking. Access is predefined for each user such as credit notes, discounts, product price alterations etc.

Wise POS is built on Dynamics NAV standard functionality with add-ons and integrated features of the stock & sales systems, customers and dimensions, including offers, product prices, and customer discount groups. Since all transactions are stored inside Dynamics NAV you can also do powerful analytics directly from NAV (recommended Wise Analyzer).

The Wise POS solution offers a touch-screen interface or a mouse, depending on user needs.

Among customers in Iceland using the Wise POS system are: Sjórnvarpsmiðstöðin, Heimilistæki, Hringrás, Eirberg, Vodafone, and B&L.
